Welcome to **Florida Law Help**, a statewide website that provides free legal information and resources to low-income Floridians. The site was developed by legal services programs across the state. Our goal is to help people understand their legal rights, provide access to self-help tools and resources, and connect help-seekers with local legal service providers.

On our website, you will find easy-to-understand information on housing, family law, public benefits, employment, and more. We also provide self-help tools and a directory of legal services providers.
Florida Law Help helps you find answers, get support, and defend your rights.
