

How to put FloridaLawHelp.org Topic links on a website

DLAW template

Step 1: Navigate to a topic page or a sub-section (for example, School, or a sub-section of School such as Special Education).

Step 2: Go to the website address (aka "URL") at the top of the page and add "?kiosk" to the end of it.

Step 3: Copy the new website address (with the "?kiosk" at the end) over the "Copy Link Here" in the HTML code below.

```
<iframe src="Copy Link Here" style="width: 300px; height: 400px; border: none;"></iframe>
```

Note: You can change the size of the box of links by changing the width and height in the HTML code (yellow highlighted part of code above). For example, you can change "width: 300px" to "width: 400px" to make it wider.

Step 4: Copy and paste the HTML code you created into the html of your website.

To test it out on a blank webpage:

Step 1: Go to <https://codepen.io/pen/>

Step 2: Paste the HTML Code (from Step 3 above) into the HTML section. See what it looks like in the display window at the bottom of the page.
